**REASON FOR ALLOWANCE**

**EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. The application has been amended as follows:

- claim 1, line 5, delete "the" and add "an";
- claim 1, line 6, delete "the" and add "a";

3. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, Umemoto et al (US 5,771,464) discloses a hands-free handset for a cordless telephone adapted for household use, the cordless telephone including a base unit (3) and a handset (4) (col 4, lines 18-20), the handset comprising:

detecting use of a state of battery (col 9, lines 24-25);

a voice loop for demodulating (via demodulation circuit 26) a signal received by a medium frequency loop for conversion back to a voice signal for subsequent amplification and output (col 5, lines ),

automatically using a speaker and a microphone (4b) built in the handset prior to connection of the external speaker (col 5, lines 48-50), and

amplifying (via amplifier 36) and modulating (via modulation circuit 26) a voice signal received by a microphone (4b) and outputting the same to the medium-frequency loop for amplification and transmission (col 6, lines 1-3); and

a port switching device (3d) for realizing switching between an external speaker (3a) and an external microphone (3b), that is, automatically using a speaker (4a) and a microphone (4b) built in the handset (4) (col 5, lines 56-59);

detecting intensity of voices both parties to realize an automatic gain modulating function and to reduce edge sounds to a certain extend (col 6, lines 26-28).

Bodnar et al (US 2004/0,097,264) disclose an automatic hang up feature in wireless phones (paras. 26, 47).

Umemoto et al, Bodnar et al, and the cited prior art fail to further disclose:  
an automatic receiving and automatic hanging-up control loop for detecting a ringer signal to control and realize an automatic receiving function,  
detecting a busy signal to realize a function of automatically hanging up;  
automatically cutting off the speaker and the microphone built in the handset and  
detecting intensity of voices of both parties to realize thereby realizing a hands-free function; and verifying a code of the handset to eliminate error actions.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
